

# Hyphen Applications Portal

«Simple and fast, the portal allows you to access Hyphen applications and manage your users.»

## LICENSES MANAGEMENT

### License package

When you buy a license for an Hyphen application, it is **valid for 1 year**. A license includes a number of activations that you can **share with collaborators** in your organization.

If you are the owner of a license you can, through the portal, view at any time the **status** of the license and manage **shared access**.

### Licenses sharing & access

You can share the purchased license with your users by **inviting them** using their **email addresses**. You can invite as many users as you wish. The connections are limited by the purchased number of activations.

At any time you can **add or remove users access**. If you revoke an activation, its will be released **30 days after** the last user connection to the application.

## ONE PORTAL MANY APPLICATIONS

The Hyphen portal allows you to manage your account and access to purchased applications. With the secure Hyphen portal, do not waste time managing access and focus on your business.

### SECURE & SAFE DATA

Full encryption
