KEY FEATURES

Software as a Service

Weestab is a web application **available 24-hours a day** on the Internet. The application is hosted on the **cloud** and data is secured with a **full encryption**.

Access and **accounts management** are handled via the secured Hyphen Portal.

Data preview

Visualize your parameters to **validate data** and assumptions before running the analyses.

Download report

Weestab reports are business oriented in the context of stability studies.

Report is built according **eCTD guidance** to make easier the sharing of results.

A unique reference number is used to ensure uniqueness between reports over the lifecycle of the product.

Data import

Play and **replay analyses** in the simplest way with the import assistant.

Load directly an example dataset into the application and get quickly an overview of functionalities.

Validated results

Submit the ICH Q1E algorithm to estimate **shelf-lives**.

Get **release limits** to verify the consistency with acceptance criteria at shelf-life.

Focus on the most relevant graphics and statistical results.
